

Are you ready for kick off?

Dear Mr Großmann,

Start your application in photonics together with OWIS: **LASER World of Photonics** is the right time, our **booth B5.321** is the right place and we from the OWIS exhibition team are **your competent source of ideas**.

Do you just want to be inspired at first?

Then a visit is also worthwhile. At our booth you will experience **alignment and handling systems** live and learn how **fast and flexible** we can realize your applications in **photonics** with our broad product portfolio and OWIS Engineering.

Take a look around our booth already today:

**SNEAK PREVIEW**

We at OWIS are in the starting blocks and very excited to exhibit at LASER World of Photonics in **Munich/Germany** from **April 26 to 29, 2022**. For us it is also a small premiere: For the first time we present OWIS with a new face, a new line-up around the **OWIS vacuum product line** and the new business unit **OWIS Engineering**.

As you can see, there is a lot to discover.

We look forward to meeting you and your challenge!

Kind regards from Staufen in Germany

Your OWIS exhibition team

**PS:** Do you want to know who the OWIS exhibition team is? Here we introduce ourselves: [owis.eu/en/laser](https://www.owis.eu/en/laser)
